ABOUT US

We are passionate about Financial Technology and Financial Markets and bringing them together in a unique way to enable building next-generation FinTechs. Having started by focusing on dividends by developing the world’s first B2C platform for reclaiming withholding taxes, a multi-billion dollar market, Divizend became a deep-tech company which builds all components of its digital finance foundation itself, namely the first international securities aggregation API (PSD2 for securities) and a groundbreaking, graph-based securities and company database. Now, we want to bring this to a new level by creating a revolutionary, open financial ecosystem.

YOUR PROJECT

We are looking for IDP or project students (m/f/d) in full- or part-time to support us in building Divizend’s new open financial ecosystem, the Actor. Your tasks will be:

● Research existing legal and taxing frameworks from companies with similar business models.

● Research on national and international regulation concerning digital marketplaces (e.g., like Apple’s App Store) regarding the chain of payments (end user → Divizend → developer), cross-border payments, developer fees, taxing and tax optimization.

● Develop and define a legal framework for Divizend’s novel, revolutionary marketplace which offers modules dealing with financial market data to B2C customers with subscription-based payments.

● Always work closely together with the marketplace expert from our team to perfectly match up the business model with legal requirements.

WHY JOIN US

● Experience the fast-paced working environment of a highly innovative FinTech with a proven track record (won EY Start-up Academy + several EU projects)

● Create concepts for and work on a groundbreaking platform, to democratize access to sophisticated investor tools for a broad and growing audience

● Work flexibly and remotely in a young, interdisciplinary team

● High self-responsibility: Bring your own ideas and shape your work

WHO YOU ARE

● Background: intl. business law and taxation

● Strong interest in refining the marketplace’s business model to align it with legal and taxation aspects

● Interest in dealing with (international) authorities and related (financial) regulations

● Legal experience in eCommerce, FinTechs, (subscription-based) digital services and cross-border payments is a plus

If this sounds interesting to you, send your CV and transcript to Emanuel & Julian.
We are looking forward to meeting you!
