

## **Co-founder (m,f,x) – Healthcare Venture (stealth mode)**

Remote work assumed, full time

### **Job description**

#### **ABOUT US**

*Our purpose: Increasing the quality of life of psoriasis patients.*

The founding team aims to bring deep experience from 10+ years of professional experience each to improve the life of psoriasis patients across the globe. One of us is Partner at one of the world's leading strategy consulting firms. The other is head of a finance department at a large German company.

#### **WHAT WE OFFER**

We are convinced that our idea has significant potential and will bring major impact to the dermatological market. Psoriasis, a non-contagious skin disease, can severely affect the lives of those affected. Besides the most common treatment with cortisone, phototherapy has established itself as a proven method. We aim to rethink existing products and advance them clearly – to enable a treatment that is more efficient, effective, comfortable, and safe. The creation of a digital-based patient and physician ecosystem will facilitate both research and marketing of our new product. In your role, you will have the possibility to bring our idea to life by joining us at the very beginning of our journey. We are looking for a potential co-founder who identifies with our purpose and is dedicated to bringing the idea to life.

Working mode will be remote.

#### **WHAT WE ARE LOOKING FOR**

We are looking for a potential co-founder that is willing to dedicate her/his time to our project. You will be responsible for initiating the next steps, such as the further validation of the hypotheses and the initiation of prototype development. Work experience is not a mandatory requirement, more important is your commitment and strong ambition to successfully push activities independently under guidance by the two senior co-founders. You need to be self-motivated, self-organized, creative, and equipped with an entrepreneurial mindset to go new ways.
