We deliver drugs on demand.
IDP: Software Engineering

Who WE are:
• Aponia is a Munich-based startup founded by TUM alumnus and HM alumnus.
• We offer local pharmacies a SaaS platform for drug deliveries by bike, from the pharmacy to the end customer.
• This service enables local pharmacies to open up a new sales channel in order to remain relevant for end customers in the age of e-prescription.
• Webpage www.aponia.de

What to know before the IDP:
• IDP is supervised by Professorship for Operations and Supply Chain Management (OSM)
• Applications are possible as team or individuals
• Theoretical part can be chosen by you

What we offer:
• Join a highly driven team with flat hierarchies with room and freedom to experiment and learn
• Flexible working times to fit your studies with clear objectives and goals
• Work remotely or on-site in our office in the heart of Munich
• Possibility to join the team as a working student or full time employee

Who YOU are:
• You have experience in REST API, GraphQL, Python and basic knowledge in optimization models.
• You are a teamplayer with ability to take responsibility for her/his tasks
• You are passionate about learning new approaches and want to establish entrepreneurial skills
• Fluent in English, German beneficial

What to know before the IDP:
• You have experience in REST API, GraphQL, Python and basic knowledge in optimization models.
• You are a teamplayer with ability to take responsibility for her/his tasks
• You are passionate about learning new approaches and want to establish entrepreneurial skills
• Fluent in English, German beneficial

Your RESPONSIBILITIES:
Improve our delivery platform, which connects and efficiently manages workflows from pharmacies and bike couriers, to work on a larger scale
• Improve the performance of our optimization model by applying GPU programming
  • Investigate the integration of GPU-Code in Python (e.g. using the cupy-framework)
  • Implement a highly parallelised system which uses all Cuda-cores of a GPU to perform our route optimization
• Deploy your solution to our existing environment and test it with real world data

How to apply:
As a team or individual send the following information to David.heid@aponia.de:
• CV(s) and LinkedIn (if existing)
• Earliest possible starting date
• Previous projects and team experiences (couple of sentences)
• Any questions you might have
